

## biocrates kits LC-MS compatibility

Requires standard flow (U)HPLC system (any manufacturer).  
 NanoLC and microLC are not supported!

biocrates kits are developed and validated under standardized, quality-controlled conditions with respect to inter-lab comparability. To that extent, biocrates kits are only supported when used with the LC-MS instrumentation listed below.

Method parameters for instruments not listed below have not been developed, tested, or optimized. biocrates cannot guarantee proper performance or assume responsibility when the kits are used with unsupported platforms. Optimal kit performance, data quality, and reproducibility can **only** be expected when using supported LC-MS platforms.

Triple quadrupole options					
	MxP® Quant 500 XL kit	MxP® Quant 500 kit*	SMartIDQ alpha kit*	AbsoluteIDQ p180 kit*	AbsoluteIDQ Bile Acids kit
